## FLQ CRISIS NOT OVER YET EX-RCMP AGENT CLAIMS

### CRITIC OF PRIME MINISTER LAUDS ACTION OF SENDING TROOPS TO QUEBEC

(Exclusive to The Coleman Journal)

CRESTON, B.C. — The recent political crisis in Quebec is "far from over" — even though Prime Minister Pierre Trudeau saved Quebec from destruction by ordering Canadian troops into the province during the FLQ terrorism.

As long as FLQ sympathizers remain within all levels of Quebec government — says former RCMP undercover agent Pat Walsh — the problem of "urban guerrilla warfare" will remain in Quebec.

Mr. Walsh, speaking to a capacity audience at the Kootenay Hotel here Jan. 13, said Prime Minister Trudeau and a few members of his cabinet were pitted against "pro-FLQ" Quebec officials.

Listed by Mr. Walsh as being pro-FLQ are:

Maurice Lague, Quebec's assistant attorney-general.

Claude Morin, deputy minister of federal-provincial affairs, Quebec cabinet.

Michel Chartrand, president of a Montreal labor council.

Rene Levesque, leader of the separatist Parti Quebecois.

Claude Ryan, editor of the French-language newspaper Le Devoir.

Jacques Hebert, writer-publisher.

Charles Gagnon, now jailed under the War Measures Act.

Allied with the prime minister against the FLQ supporters, Mr. Walsh said, were Expansion Minister Jean Marchand, Secretary of State Gerard Pelletier, Montreal Mayor Jean Drapeau, Quebec Labour Minister Pierre Laporte.

Mr. Walsh said it was because of Mr. Laporte's opposition to the FLQ—and his influential position in Quebec Premier Robert Bourassa's cabinet—that Mr. Laporte was kidnapped by the FLQ . . . and eventually killed.

"LaPorte was once a separatist—who decided to support federalism by fighting against separation in Quebec."

#### HATED LAPORTE

"Robert Bourassa knew, when he was elected premier, that he had to count on one man. That man was Pierre Trudeau," Mr. Walsh said.

"I was the only man that I knew was keeping tab on the revolutionaries. This is why the separatists hated Mr. LaPorte," Mr. Walsh said.

Mr. Walsh said those who planned the kidnapping of Mr. LaPorte (and British Trade Commissioner James Cross) realized Premier Bourassa would be panic-stricken.

"They (terrorists) knew they were striking a terrible blow at the Quebec government because LaPorte was a valuable man proposing a new and inexperienced government."

#### ARMED TROOPS

"Premier Bourassa knew if he didn't do something fast, Quebec would have gone down the drain," Mr. Walsh said.

As a result, Premier Bourassa asked to have Canadian troops sent to Quebec.

Mr. Walsh, one of Prime Minister Trudeau's most severe critics, credited the prime minister with taking the much-needed action against the FLQ.

"Trudeau decided to do the only thing that had to be done. If the army hadn't been sent into Quebec, we wouldn't have a Quebec today—we'd have a state of chaos."

#### SCUM AND RATS

The army was the most heavily organized the Quebec people ever had," Mr. Walsh said.

Mr. Walsh said it was only the influence of the Canadian Army, sent by the prime minister, that program.

#### WHO IS . . . PAT WALSH ?

A former undercover agent for the RCMP, Pat Walsh is now research director for a nursing home for the Crowsnest Pass.

Born in Quebec, Mr. Walsh has exposed the Quebec Liberation Front and the international Communist inspiration behind Quebec terrorism.

From 1961 to 1965, Mr. Walsh said, the FLQ was strongly influenced by political machines in Cuba and Algeria.

During his career, Mr. Walsh has testified before numerous government tribunals—including the United States Un-American Activities Committee.

He is considered an authority on Communism in Canada and the U.S.—and has lectured throughout the world on international issues.

Mr. Walsh recently concluded a cross-Canada speaking tour, which has drawn capacity audiences throughout rural areas of the western provinces.

He is currently enlarging his speaking schedule for possible appearances in the Crowsnest Pass—in addition to his regular tours to south-central Alberta, B.C., Saskatchewan and Manitoba.

Mr. Walsh is pictured above as he appeared in 1949, when he served Interpol as an undercover agent in Tangiers.

#### FOOTHILLS

EDMONTON—Lands and Forests Minister J. Donovan Ross has announced his department is co-ordinating a study project entitled "Foothills Resource Allocation Study" to determine the most beneficial allocation of resources in the foothill region of Alberta.

Mr. Skinner, elected at a meeting last Jan. 4, will be assisted during the year by:

Leslie Owen, vice-president; and Mel Taje, equipment chairman.

**SUSPENSIONS**—Highways Minister Gordon Taylor reports for the month of December that drivers' licences of 29 persons were suspended under the demerit point system. During the same month 501 courtesy notices were sent to persons who received more than eight demerit points. Under the demerit point system, April 1 to Dec. 31, 1970, the licences of 155 persons were suspended and 3,245 courtesy notices were sent out.

**BRUTAL MURDER**—That manifesto is a piece of propaganda. But when it does speak of the brutal murder of heroic prisoners (LaPorte), the terrorism, the bombing and maiming of innocent persons," Mr. Walsh said.

He said FLQ terrorists are the offspring of an "affluent, self-indulgent society."

Mr. Walsh outlined the growth of the FLQ from 1960 to 1970.

#### REVOLUTIONARIES

He said the FLQ was spawned by Georges Schoeters (a Castro-Cuba supporter) with the aid of three other revolutionaries: one of whom was a deserter from the French Foreign Legion . . . and one of whom is now working in Tunis for External Affairs Minister Michel Sharp.

From 1960 to 1963, Mr. Walsh said, the FLQ was strongly influenced by political machines in Cuba and Algeria.

From 1961 to 1965 the FLQ was influenced by the Red Chinese and from 1965 to 1970 by Maoist factions, Mr. Walsh said.

During his career, Mr. Walsh has testified before numerous government tribunals—including the United States Un-American Activities Committee.

He is considered an authority on Communism in Canada and the U.S.—and has lectured throughout the world on international issues.

Mr. Walsh recently concluded a cross-Canada speaking tour, which has drawn capacity audiences throughout rural areas of the western provinces.

He is currently enlarging his speaking schedule for possible appearances in the Crowsnest Pass—in addition to his regular tours to south-central Alberta, B.C., Saskatchewan and Manitoba.

Mr. Walsh is pictured above as he appeared in 1949, when he served Interpol as an undercover agent in Tangiers.

#### ELECTED

Doug Skinner has been elected 1971-72 president of the Coleman Athletic Association.

Mr. Skinner, elected at a meeting last Jan. 4, will be assisted during the year by:

Leslie Owen, vice-president; and Mel Taje, equipment chairman.

#### FOOTBALL

## LEGION BINGO

Winners of the Jan. 15 Coleman Legion bingo are:

\$25, Mrs. Castellano; \$12.50, Mrs. Blayewich, Mrs. Oullette; \$10, Martin Ulrich, Willy Szytek, Mrs. Jensen, Mrs. Martin Ulrich, Mrs. Schultz, Mrs. Parry.

\$4, Mrs. Schultz, Irene Lether, Mrs. Plesse; \$2, Mrs. Castellano, Mrs. Kubica, Marie Kinnear, Shirley Leapeck, Mrs. Tarabula.

Extra card bingo (\$120.25 total).

Mrs. Plesse, Mary Tiffin, Mrs. Kubica, Margaret Gates, Mrs. Parry, Anne Dorusak.

## BINGO WINS

Winners of the Jan. 13 Coleman Lions' bingo are:

\$50, Ellen McDonald; \$25, Kay Gallamore; \$15, Mrs. Rosnel, Polly Snowden, Francis Cote, Mrs. Jensen; \$13, Mrs. Pisony, Marg Krywol; \$10, Mrs. Zoke, Irene Lether, Isabel Sprevak, Mrs. Pisony; \$5, Mrs. Jahn, Mrs. Oullette; Mrs. Hummel, Saaron Blas.

An iron prize was won by Len Cole.

## School News

By CHRISTINE LINDHOLM

Horace Allen  
High School

Well, hello again!

Classes have been adjourned from Dec. 23 to Jan. 4, but now we are back to settling down with our school work again.

Our Christmas concert was held Dec. 23, and it was very well received. Donations along with some of the students' earnings coming to a total of \$46, were given to the Cup of Milk Fund.

Another item on our list was the Christmas dance. The "Carp-diem" played for us, and, judging from the enthusiastic crowd, it was quite a success.

A volleyball tournament between Coleman, Blairmore and Bellview was recently held in the Horace Allen gym.

Till next time, adios.

## BROOKS . . . From Front

They are vegetable production, pomology or fruit production, environmental horticulture and storage physiology.

Over the years the station has played an important role in helping Alberta residents develop productive and attractive home gardens and fruit orchards. There are few homesteads in the province which do not derive benefits from breeding, cultural and management practices carried on at the station.

In the area of commercial vegetable production, the station has won national and international acclaim for its breeding, varietal and cultural trials, and through its storage and quality studies.

The station's location in southern Alberta has been a major factor in helping the province to develop a viable and growing fresh vegetable industry.

## GAS . . . From Front

The planned \$1.5 million extension will divert from Sparwood in the vicinity of McGillivray where CNG gets its supply and go almost due north up the Elk Valley the 30 miles to location of Fording River Coal Ltd. operation under development for 1971 contract start of export in a large Japanese contract.

The application cites July 1 as start of construction barring valid objection to the PUC, with completion within three months.

Longest previous extension was between the 22-mile line north from Wycliffe bridge to Skookumchuk to serve Crestbrook Forest Industries.

## PHOTO . . . From Front

Fibre dealers and processors throughout the province are co-operating with the provincial Centennial committee, and are being supplied with combined entry forms and mailing envelopes, with full details of rules and prizes offered.

The contest opened Jan. 1.

## Editorially SPEAKING

### Conservation Needed

Canada's decision to declare exclusive fishing and pollution control jurisdiction over more of our coastal waters will be generally welcomed in this country.

Fisheries Minister Jack Davis says an additional 80,000 square miles will be closed in February to foreign fishing nations, although rights of American and French fishermen will be preserved. He proclaimed the extension of jurisdiction under the territorial Sea and Fishing Zones Act approved earlier this year.

The proclamation includes the Queen Charlotte Sound and Dixon Entrance, as well as the Gulf of St. Lawrence and the Bay of Fundy.

The action is well justified.

The depletion of many common food species, particularly in the Grand Banks, has reached the danger point. The necessity to control oil pollution has been hastened by recent sinkings of tankers in the gulf.

Closing the historic eastern fishing grounds will require co-operation from Britain, Norway, Denmark, Portugal, Spain and Italy, all of whom have fished the waters for centuries. Mr. Davis has not indicated what their reaction is to Canada's new policy. There may be difficulties to overcome.

### Farmer's Delight

In an economy where clear evidence of upturn is hard to find, the current news about wheat is a bright indication of better times ahead.

The recently negotiated sale of 93 million bushels of wheat to China, together with substantial sales success elsewhere in the past few months, could push total exports in the current crop year to more than 650 million bushels. This is double the likely size of next year's crop in Western Canada. It is also more than double sales abroad last year.

These developments will give the hard-pressed Prairie economy an immediate lift – albeit mostly a psychological one. Final payments for the current crop year may not be made until early 1972.

At the same time, however, sales on this scale suggest a whole new credit base for business in the west. Equally important, in the forthcoming renegotiation of the International Grains Agreement, Canada's negotiators will be in a much stronger position to push for a higher minimum world price – and expect it to stick.

The sudden turnaround in sales prospects for wheat and other grains – what other industry has such dramatic flip-flops? – clearly does not mark a new dawning of western prosperity. Far from it. Improved sales through the next year will, in essence, only provide more time for basic change in the mix and extent of Prairie farming.

These facts are recognized in Ottawa's new proposals to encourage farm diversification in the west. Their aim is to assist farmers to produce, year by year, the grains most likely to be in high demand – which is certainly an important step in the right direction.

The question now is whether the proposals will, in fact, bring about the best possible use of land at the least possible cost to taxpayers. This could involve long and fractious debate. But at least the process of much-needed change is firmly launched.

### III Timed Report

The recommendations of a special committee on pay increases for parliamentarians come at an exceptionally inopportune moment, when as NDP leader Tommy Douglas says, "the government is freezing the old age pension, holding down the veterans' pensions and making a poor contribution to help the unemployed."

In fact, however, the government may be wise enough to defer action on the recommendations until a more propitious time. And the recommended changes are more reasonable than cynics may have expected no matter what a boost of \$7,000 a year for House of Commons backbenchers sound like to the old age pensioner with an increase of 42 cents a month.

The committee calls for the raising of the MPs' pay in two stages – \$5,000 at the next session, and another \$2,000 at the start of the next Parliament, which would normally be in 1972.

Thus the electorate will be able to have some say in the matter if the proposals are followed. The first part of the pay increase will be fresh enough in mind, if the government finds the time right to implement it, for voters to recall whether their MPs favored it. And the candidates in the next election, no doubt, will be invited to say what they think of the second part.

### The Best Of A Few Bad Years

Now that you didn't get what you wanted for Christmas, what would you like in 1971?

It's a pretty messy old world, as it always has been, and nobody is likely to get what he wants in the coming 12 months. But it's the only world we have, so let's make the best of it: hope, pray, dream and, equally important, remember that the Lord helps those who help themselves.

For the world, we can only hope for an end to war, and pray for peace in all the touchy areas. But there's something Canada can do: stop selling arms. It's hypocritical to talk peace, point the finger at others, when you're standing up to the waist in the muck of arms' sales yourself.

I'm afraid we can only dream about an end to unemployment, pollution, terrorism and inflation. They won't be solved in 1971.

But surely to goodness some progress can be made toward solutions. There is something frightening about a country with the natural resources of Canada looking forward to a long hard winter for over half a million unemployed. That's a sharp decline in poverty, drug abuse and alcohol use. Lots of bright winter days and hot summer days. An end to the tension, one way or the other, between Quebec and the rest of the country. An end to the endless talk about housing, education and equality, and the beginning of some action. A return to faith in our gov-

ernment, our religion and ourselves, all badly corroded in the last decade.

For my faithful and friendly readers, I'd like to see some special things in the coming year: good health, a closing of the generation gap, warmer personal relationships, fine, healthy children, a small oil bill, and if you must spoil the whole thing by kicking the bucket, may it be quickly and painlessly.

I also hope that your garden grows, that your car doesn't rust, that your roof doesn't leak, that your wife doesn't nag, that your husband doesn't drink too much. A big order, but there it is.

For myself, I can dream, but I don't really want much. I'd like to improve my golf, fishing and curing. But I don't really hope. They seem to go downhill steadily.

Inflation is a cancer. But we're desperately searching for a cure for cancer. Can't we do the same for inflation? I, personally, will take a cut in income if the government will cut my income tax.

For my country, these are some of the things I'd like to see in 1971. Full employment, or as near as possible. Less economic and cultural dependence on our benefactors. Up to a sharp decline in poverty, drug abuse and alcohol use. Lots of bright winter days and hot summer days. An end to the tension, one way or the other, between Quebec and the rest of the country. An end to the endless talk about housing, education and equality, and the beginning of some action. A return to faith in our gov-

ernment, our religion and ourselves, all badly corroded in the last decade.

I'd like to be able to walk without an elastic bandage around my knee. I'd like my waist-line to stop growing and my hair to start growing. I'd like to wind up the year with the same number of teeth I have right now. These are still in the dream category.

I'd like to spend a full two weeks, anytime during the year, without a domestic crisis: cat, kids or wife.

But most of all, I'd like to be sitting right here, a year from now, writing a column about a 1972 that looked a lot more promising than does 1971.

And the same to you.

### FARM TAX TIPS

Q. What may I claim on my income tax form as wages to my children for work on the farm?

A. Basically, you may claim an amount that was paid to your child if the child performed work which would have otherwise required the employment of a hired help. Also, any wages paid must be in line with what would have been paid to a stranger, and the work done must be related to farm income.

The farm I operate is located seven miles from town. During the summer months we live on the farm, then move to town for the winter months. Can I claim on my income tax expenses such as taxes and repairs on the town house for the portion of the year during which we live in it?

A. Expenses paid for the maintenance of your own house are considered to be of a personal nature and are therefore not allowable as a deduction from income.

Q. When filing tax returns are commercial reserves and elevator deductions to be reported as income for the year they were paid out to a farmer?

A. Normally these will have been reported in the year when credited to his account, and would therefore not be included in the tax income when actually received.

Q. If I sell grain to a grain company and request that payment be deferred until the next year, in which year do I report the sale as income on my tax form?

A. You report it in the year it was sold to the company. The fact that you provided them to hold payment until a later year does not change the date of sale. However, if you placed the grain in storage, received storage tickets and did not surrender them until a later year, at which time you are issued a cash ticket, you would report the sale in the year the cash ticket was issued.

Q. I am a farmer and I used the year of averaging for income tax purposes and am eligible to average again in 1970. Am I required to average again in 1970 or the year of averaging, or can I wait until a year in which averaging would be more beneficial to me?

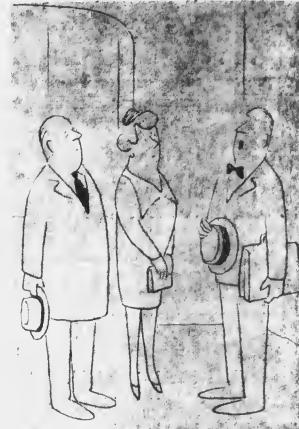

A. You may choose any year you wish, provided the year of averaging is not more than three years from the year of averaging, or can wait until a year in which averaging would be more beneficial to me?

A. Your husband is a farmer and is increasing his income from farming or logging. He would be able to claim a deduction for the tractor. However, if he has no income from farming or logging, and the tractor is not being used for the purpose of producing income, he would be unable to claim depreciation.

Q. Is a farmer required to make Canada Pension Plan deductions from the wages paid to farm help?

A. Deductions for the Canada Pension Plan must be made from all wages paid for farm labor, provided the employee is between 18 and 70 years of age and has received cash wages of \$20 or more and has worked for 25 days for the employer during the year.

## CHUCKLE OF THE WEEK

### LEGISLATURE REPORT

By KEVIN PETERSON & DON SELLAR

— of The Calgary Herald —

When Albertans travel to the polls in this year's provincial election, they will choose their government from a record-size slate of candidates competing for the 75 Legislature seats up for grabs.

So far, 123 candidates have entered what is billed as an election showdown between the 35-year-old Social Credit government and a resurgent Conservative opposition.

It's virtually certain that three parties—the Socreds, Tories and New Democrats—will field full slates in the forthcoming campaign, while the small but increasingly vocal band of Liberals could run at least 45 candidates, for a total of 270.

The 1967 election—E. C. Manning's last as Sacred leader—saw a record 236 men and women for 65 House seats. Under redistribution, the Legislature will swell to 75 members next time.

An upswing in political interest and activity across the province this year stems from an obvious situation. Premier Harry Strom's leadership is untested in the polls, while the Peter Lougheed Tories have scored two consecutive election victories and added two MLAs to this caucus by defection since 1967.

For Mr. Lougheed, the election represents the most important challenge to face his party and his leadership since its revival five years ago. There have been two previous threats to Sacred supremacy, but both lost momentum when they failed to develop widespread support following impressive organizational starts.

It is generally conceded that Mr. Lougheed will have to carry 25 seats in the new House if the Tories wish to form a government in Alberta during this decade. A lesser performance than this would likely lead to waning interest in the party as a credible alternative to Social Credit.

With the expanded Legislature, and an unprecedented number of Sacred newcomers running for election, an Opposition party has never had a better opportunity to gain power.

At the moment, the Tories feel they are in acceptable shape in the cities of Edmonton and Calgary which elect 29 MLAs, but they face the traditional Opposition problem of wresting rural seats from the Socreds.

If Mr. Lougheed can't gain support in the country, he can't become premier.

The Socreds, meanwhile, are trying to win back the cities, sell their new leader to the people and maintain their hold on rural Alberta constituencies.

Two parties are now emerging from the Christmas hiatus, and soon the fun will begin flying again. It's probable the House session opening Feb. 11 will mark the start of a feverish count-down to election day.

The betting is that the session will be short and acrid, as the opening blows for the election campaign are traded.

And if there is doubt about an election in 1971, it should be dispelled by the news that the cabinet has just allotted \$10,000 for the printing of essential election forms.

### EMPLOYMENT OPPORTUNITIES

EDMONTON—The employment opportunities program of the department of social development in Edmonton has now completed the second phase of its development and expansion.

The first phase, from June 1 to Sept. 15, 1969 consisted of a pilot project in Edmonton, where three placement officers of the department of social development demonstrated that five times as many recipients of social allowances were placed in employment when they received help in obtaining employment.

The second phase was a continuation of the program up to the present time.

In the phase the number of placement officers in Edmonton was increased and the program was expanded into the city of Calgary.

During this period there was an average of 16 placement officers employed in the program.

Up to the present time, about 150 eplacement opportunities have been made available to the

program by business, industry and government in Edmonton and Calgary.

As a result of this, about 600 former recipients of social allowances were now enjoying full-time employment.

Approximately 300 other persons who were receiving social allowances were returned to employment by the program. More than 30 persons were placed in training in preparation for employment.

At the end of the second phase, persons on employment were earning more per month than the assistance they had received before employment.

About 125 persons who were unable to earn sufficient for the needs of their larger families continued to receive a small social allowance supplement to meet their needs.

## ★ HOROSCOPE ★

THIS IS YOUR LIFE

By TRENT VARRO

**ARIES** — March 21 to April 19 — **LIBRA** — Sept. 23 to Oct. 22 — Welcome a chance to let your mate set the pace where joint activities are concerned. There may be considerable activity linked with partnerships, finances or money transactions this week. This could be a busy time.

**TAURUS** — April 21 to May 19 — A good time to help others now. It is quite possible that you are but don't become too involved in other people's problems. You can get much accomplished if you are patient and persevering. Every thing will work out.

**GEMINI** — May 22 to June 21 — Get an early start if a short trip or visit is planned for the week. Avoid people and activities which can put a strain on health or invite trouble. Don't let temper get the best of you.

**CANCER** — June 22 to July 22 — Friends can be very stimulating and interesting right now. Welcome any chance to get out and enjoy a change of scene. Your business sense is very sharp right now. Watch out for legal entanglements.

**LEO** — July 23 to August 23 — Don't expect too much from friends or social life at this time, the cost may be more than you can afford. Don't do anything to invite emotional stress. Best to be silent and do nothing.

**VIRGO** — August 24 to Sept. 21 — Originality can pay off. You have the spotlight and you exercise a strong influence on those you love. Give close attention to home or family affairs. Timely moves help a lot. Good time not to borrow or lend.

**PISCES** — Feb. 19 to March 20 — A change for privacy and rest is in the stars for you at this time. Try to avoid too much travelling about or visiting under current influences. Don't let negative emotions affect health.

**AQUARIUS** — Jan. 21 to Feb. 18 — Put any new ideas you might have right now to work and you will be sure to benefit you if you carefully evaluate all the angles and be guided by sensible thinking. You can't go wrong.

**SCORPIO** — Dec. 22 to Jan. 20 — Travel, communication and writing will probably take up much of your time during the next couple of weeks. Some surprising benefits are coming your way. Gain is indicated for you in some form or another.

**CAPRICORN** — Dec. 21 to Jan. 19 — Friends will be plenty of action around you this coming week. Get out and move as much as possible. Much can be accomplished through teamwork. Gain is indicated for you in some form or another.

**TAURUS** — Nov. 23 to Dec. 21 — One thing is certain Sagittarius, there will be plenty of action around you this coming week. Get out and move as much as possible. Much can be accomplished through teamwork. Gain is indicated for you in some form or another.

**SCORPIO** — Feb. 19 to March 20 —

A change for privacy and rest is in the stars for you at this time.

Try to avoid too much travelling about or visiting under current influences. Don't let negative emotions affect health.

**Rabies Control Committee Named To Co-ordinate Provincial Work**

EDMONTON—Agriculture Minister H. A. Ruste has announced a central rabies control committee to co-ordinate all rabies control work in the province.

He said protection of humans from the disease is of primary importance. Rabies detection, diagnosis and control is the responsibility of the federal health of animals branch.

Mr. Ruste said the provincial government can assist by trying to prevent the spread of the disease by wildlife to humans and domestic animals.

Mr. Ruste said the provincial department of health has already made pre-exposure immunization available to veterinarians, wildlife officers, police and others whose work might expose them to direct contact with infected animals.

He also said the provincial health department maintains a supply of serum and vaccines which are immediately available if required for treatment of individuals bitten by or exposed to rabid animals.

Based on experience and success of a rabies control program used between 1952 and 1956, the decision had again been made to

try and control, and hopefully to eliminate the disease in its natural environment.

Mr. Ruste said the provincial department of health has already made pre-exposure immunization available to veterinarians, wildlife officers, police and others whose work might expose them to direct contact with infected animals.
